To ensure your safety and everyone else's:

To KEEP IN MIND

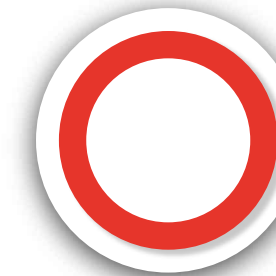

No pedestrian crossing

If you see this sign, you must not cross on foot.

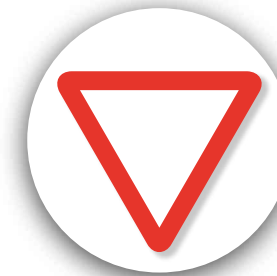

No entry

When you see this sign, you may not travel in that direction.

No vehicles

No vehicle may pass when you see this sign.

Yield

In front of this sign, you don't have priority and must wait for your turn to pass.

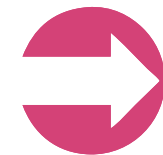

IF YOU ARE WALKING:

- The tram is the king of the street! It always has priority, even if there's no traffic light. **Let it go first!**
- Cross only at zebra crossings. Don't walk on the tracks, it's dangerous! And before crossing, always look both ways, **like an owl!**
- Listen for the bell. The tram rings a bell to let you know it's coming. Take off your headphones and keep your phone in your pocket so you can hear it.
- Wait in a safe place. When you're at the stop, stay behind the safety line. **That way you'll be safe!**

IF YOU'RE ON A BIKE OR SCOOTER:

- **The tracks are for trams only!** Don't ride your bike or scooter on them. Use the special bike lanes or the street.
- Cross very carefully. If you need to cross the tracks, look carefully and don't get your wheels stuck in the rails. **That way you won't fall!**
- Don't stop on the way. Never stand still or stop on the tram tracks. **The tram can't stop as quickly as a car!**

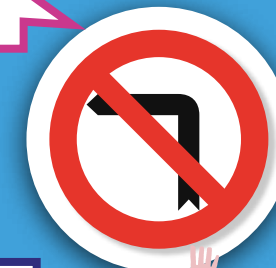

TRAFFIC SIGNS MUST
BE OBEYED

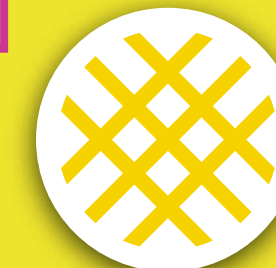

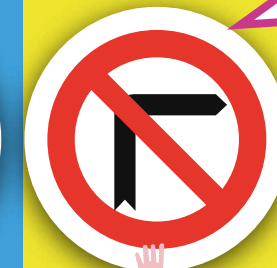

Tram warning

If you see this sign, pay attention, you may find a tram nearby.

No left turn

No right turn

Yellow grid markings on the pavement indicate crossings with the tram

On top of these lines, you may neither stop nor park.

STOP

In front of this sign, you must stop, listen, look both ways, and cross carefully.
